
Christian Isobel Johnstone, called “the bravehearted lady” by Thomas Carlyle, was editor for more than a decade of Tait's Edinburgh Magazine, a journal famous for its vigorous liberal viewpoints and incisive literary reviews. In 1815 Johnstone also became the author of one of the most extraordinary novels of the Romantic era, Clan-Albin. The story is centered around the childhood and adolescence of its orphan hero, Norman Macalbin, who leaves the poverty of the Highlands to volunteer for the army and journey in Ireland and Spain: but throughout the novel it is the voices of the strong female characters - Lady Augusta, Monimia, Flora and others - that we hear most clearly. These bring to us Johnstone's lament for the loss of Highland culture and scorn for the emergent southern mercantile classes, and portray war as a terrible tragedy whose glorification is unforgivable. Written in the year of Waterloo, Clan-Albin is a unique Scottish novel by an outstanding and neglected female voice.

Oxford Textbook of Palliative Medicine, Derek Doyle, 2004, 0198510985, 9780198510987. The "Oxford Textbook of Palliative Medicine" has firmly established itself as the definitive book on the subject and is highly acclaimed world-wide. The new edition has been significantly revised and updated to reflect the enormous changes in palliative care over the last five years. Two new international co-editors, Nathan Cherny and Sir Kenneth Calman, have been recruited and bring vast experience to the book. The new edition includes sixty-six completely new chapters and contributors. New sections and chapters devoted exclusively to such non-malignant conditions as cardiac disease, non-malignant respiratory disease, non-malignant neurological disease and AIDS have been added as well as new chapters on palliative medicine in intensive care and geriatric care, and complementary and alternative therapies in palliative medicine. There is a brand new section on contributions to palliative care of occupational therapists, physiotherapists, music, art and speech therapists, stoma therapists, clinical pharmacists and clinical psychologists. Every chapter used in the first two editions have been radically reviewed and brought up-to-date. There are authoritative international contributions from over 150 renowned experts. The book is written for doctors, specialist palliative medicine physicians, oncologists, geriatricians, surgeons, family physicians, neurologists and chest physicians. We know, however, that it is much used by nurses and researchers in other disciplines, though not written primarily for them.

**The Stage's Glory: John Rich (1692-1761), Berta Joncus, Jeremy Barlow**, 2011, 1611490332, 9781611490336. John Rich (1692-1761) was a profoundly influential figure of the eighteenth-century London stage. As producer, manager, and performer, he transformed the urban entertainment market, creating genres and promotional methods still with us today. This volume gives the first comprehensive overview of Rich's multifaceted career, appreciation of which has suffered from his performing identity as Lun, London's most celebrated Harlequin. Far from the lightweight buffoon that this stereotype has suggested, RichDthe first producer of The Beggar's Opera, the founder of Covent Garden, the dauntless backer of Handel, and the promoter of the principal dancers from the Parisian operaDis revealed as an agent of changes much more enduring than those of his younger contemporary, David Garrick. Contributions by leading scholars from a range of disciplinesDtheatre, dance, music, art, and cultural historyDprovide detailed analyses of Rich's productions and representations. These findings complement Robert D. Hume's lead article, a study that radically alters our perception of Rich.

**Joothan: An Untouchable's Life, Omapraka s a Va lmi ki**, 2013, 0231503377, 9780231503372. Omprakash Valmiki describes his life as an untouchable, or Dalit, in the newly independent India of the 1950s. "Joothan" refers to scraps of food left on a plate, destined for the garbage or animals. India's untouchables have been forced to accept and eat joothan for centuries, and the word encapsulates the pain, humiliation, and poverty of a community forced to live at the bottom of India's social pyramid. Although untouchability was abolished in 1949, Dalits continued to face discrimination, economic deprivation, violence, and ridicule. Valmiki shares his heroic struggle to survive a preordained life of perpetual physical and mental persecution and his transformation into a speaking subject under the influence of the great Dalit
political leader, B. R. Ambedkar. A document of the long-silenced and long-denied sufferings of the Dalits, Joothan is a major contribution to the archives of Dalit history and a manifesto for the revolutionary transformation of society and human consciousness.

Permanent Midnight: A Memoir, Jerry Stahl, 2005, 0976082209, 9780976082200. An extraordinary accomplishment. . . . A remarkable book that will be of great value to people who feel isolated, alienated and overwhelmed by the circumstances of their lives. Hubert Selby, Jr., author of Last Exit to Brooklyn[Stahl] is a better-than-Burroughs virtuoso. Thomas Mallon, The New Yorker[Original, appalling, indelible picture of a man trying to swim and drown at the same time. Stahl has nerve, heart, a language of his own and a ghastly, riotous humor. Tobias Wolff, author of This Boy's Life]Permanent Midnight is one of the most harrowing and toughest accounts ever written in this century about what it means to be a junkie in America, making Burroughs look dated and Kerouac appear as the nose-thumbing adolescent he was. Booklist A searing confessional infused with the darkest humor, Permanent Midnight chronicles the opiated abyss of a Hollywood screenwriter and his formidable climb into sobriety. Made into a major motion picture starring Ben Stiller and Owen Wilson, Permanent Midnight is revered by critics and an ever-growing cult of devoted readers as one of the most compelling contemporary memoirs. Jerry Stahl was born in Pittsburgh. He is author of the novels Perv: A Love Story, Plainclothes Naked and I, Fatty, the paperback edition of which will appear in 2005. He currently lives in Los Angeles.

The New Public Finance: Responding to Global Challenges, Inge Kaul, Pedro Conceicao, 2006, 0199770832, 9780199770830. The world's agenda of international cooperation has changed. The conventional concerns of foreign affairs, international trade, and development assistance, are increasingly sharing the political center stage with a new set of issues. These include trans-border concerns such as global financial stability and market efficiency, risk of global climate change, bio-diversity conservation, control of resurgent and new communicable diseases, food safety, cyber crime and e-commerce, control of drug trafficking, and international terrorism and weapons of mass destruction. Globalization and increasing porosity of national borders have been key driving forces that have led to growing interdependence and interlocking of the public domains--and therefore, public policy concerns--of countries,
governments, private businesses, civil society, and people at large. Thus, new and different issues are now occupying top places on national policy agendas, and consequently, on the agendas of international negotiating forums. The policy approaches to global challenges are also changing. A proliferation and diversification of international cooperation efforts include focus on financing arrangements. Financing of international cooperation in most instances is a haphazard and non-transparent process and often seems to run parallel to international negotiations. There are many unfunded mandates and many-non-mandatory funds. To agree on and to achieve international economic goals, we need to understand how financing of international cooperation efforts actually works. Our understanding is hampered by two gaps: 1) lack of an integrated and cohesive theoretical framework; 2) lack of consolidated empirical and operational knowledge in the form of a comprehensive inventory of past, current and possible future (i.e. currently deliberated) financing mechanisms. This book reduces these two gaps and provides a guide to improve our ability to finance international cooperation.

A Treasury of Humorous Poetry, Frederic Lawrence Knowles , 2007, 1406773786, 9781406773781. PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author
need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written—and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when me say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend-ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream- fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

Death Sentence: The Decay of Public Language, Don Watson, 2011, 1742744648, 9781742744643. Part diatribe, part cool reflection on the state of Australia's public language, Don Watson's Death Sentence is scathing, funny and brilliant.' ... in public life the language has never been held in less regard. It withers in the dungeons of the technocratic mind. It is butchered by the media. In politics it lacks all qualifications for the main game.' Almost sixty years ago, George Orwell described the decay of language and why this threatened democratic society. But compared to what we now endure, the public language of Orwell's day brimmed with life and truth. Today's corporations, government departments, news media, and, perhaps most dangerously, politicians - speak to each other and to us in cliched, impenetrable, lifeless sludge. Don Watson can bear it no longer. In Death Sentence, part diatribe, part cool reflection on the state of Australia's public language, he takes a blowtorch to the words - and their users - who kill joy, imagination and clarity. Scathing, funny and brilliant, Death Sentence is a small book of profound weight - and timeliness.

Artifacts, Charles Robin Ewen, 2003, 0759100225, 9780759100220. How can you ensure that you are learning everything your artifacts have to teach you? Ewen explores a variety of methods and techniques used to prepare, protect, and analyze artifacts once they are in the lab. In brief, user-friendly sections, he outlines the basic principles of identification, classification, quantification, data manipulation, and analysis. Students will find that Ewen's suggestions point out fruitful areas of analysis, yet do not dictate the researcher's approach. Examples drawn from 16th century Spanish sites in the Americas introduce students to the hows and whys of archaeological lab work. Visit our website for sample chapters!

Faith, Politics, and Power: The Politics of Faith-Based Initiatives: The Politics of Faith-Based Initiatives, Rebecca Sager, 2009, 0199742022, 9780199742028. There is often more than meets the eye where politics, religion and money are concerned. This is certainly the case with the Faith-Based Initiative. Section 104, a small provision of the 1996 Welfare Reform bill called "Charitable Choice," was the beginning of what we now know as the Faith-Based Initiative. In its original form, the Initiative was intended to ensure that small religious groups were not discriminated against in the awarding of government funding to provide social services. While this was the beginning of the story for the initiative, it is not the end. Instead, Charitable Choice served as the launching pad for growing implementation of Faith-Based Initiatives. These new policies and practices exist despite the fact that all levels of government already contract with religious organizations to provide social services. Nevertheless, government actors have been implementing the Initiative in myriad ways, creating new policies where none appear necessary. Using data from multiple sources this book examines how and why states have been creating these policies and practices. The data reveal three key aspects of faith-based policy implementation by states: appointment of state actors known as Faith-Based Liaisons, passage of legislation, and development of state Faith-Based Policy conferences. These practices created a system in which neither the greatest hopes of its supporters, nor the greatest fears of its opponents have been realized. Supporters had hoped the Faith-Based Initiative would be about solving problems of poverty and an over-burdened welfare system, while opponents feared rampant proselytizing with government funds. Instead, these initiatives by and large did not offer substantial new fiscal support to those in need. In the place of this hope and fear, and despite the good intentions of many, these initiatives became powerful political symbols in the fight to reshape church/state relationships and distribution of political power.

The Legend of Trinity Industries, Inc, Jeffrey L. Rodengen, 1999, 0945903537, 9780945903536. Trinity Industries, the nation's largest railcar manufacturer and a leading builder of inland barges, highway guardrails and metal components,
has a fascinating history of growth through diversification and strategic acquisitions. The company grew from a small household butane and propane gas tank manufacturer to become a $2.5 billion global giant. Trinity has acquired the assets of more than 100 companies, including the venerable Pullman Standard Company, manufacturer of passenger railcars. The Legend of Trinity Industries, by industrial historian Jeffrey L. Rodengen, recounts the determination and corporate strategy that have propelled Trinity to the leadership role of its industry.

**The Mind Tree: A Miraculous Child Breaks the Silence of Autism, Tito Rajarshi Mukhopadhyay**, 2000, 1559706996, 9781559706995. Once in a great while, a special person emerges in the history of science and medicine whose unique set of characteristics sheds light on an entire disorder and sometimes even on the mysteries of the human brain. Tito is such a person. Although he is severely autistic and nearly nonverbal, his ability to communicate through his extraordinary writing is astonishing. At the age of three, Tito was diagnosed with severe autism, but his mother, Soma, refused to accept the conventional wisdom of the time that her son would be unable to interact with the outside world. With boundless hope and determination, she read to him and taught him to write in English. She also challenged him to write his own stories. The result of their efforts is this remarkable book, written when Tito was between eight and eleven years old, comprising a collection of profound and startling philosophical writings about growing up in the most challenging of circumstances. His eloquent self-expression and beautifully crafted language reveal, for what experts say is the first time in history, how it feels to be locked inside an autistic body and mind.

first account of women's reproductive bodies in early-modern cheap print. Since little was certain about the mysteries of reproduction, the topic lent itself to a rich array of theories. The insides of women's reproductive bodies provided a kind of open interpretive space, a place where many different models of reproductive processes might be plausible. These models were profoundly shaped by cultural concerns; they afforded many ways to discuss and make sense of social, political, and economic changes such as the Protestant Reformation and the Civil War. They gave ordinary people ways of thinking about the changing relations between men and women that characterized these larger social shifts. Fissell offers a new way to think about the history of the body by focusing on women's bodies, showing how ideas about conception, pregnancy, and childbirth were also ways of talking about gender relations and thus all relations of power. Where other histories of the body have focused on learned texts and male bodies, this study looks at the small books and pamphlets that ordinary people read and listened to - and provides new ways to understand how such people experienced political conflicts and social change.

Mozart's Ghosts: Haunting the Halls of Musical Culture, Mark Everist, 2012, 0195389174, 9780195389173. Mozart's Ghosts traces the many lives of this great composer that emerged following his early death in 1791. Crossing national boundaries and traversing two hundred years-worth of interpretation and reception, author Mark Everist investigates how Mozart's past status can be understood as part of today's veneration. Everist forges new paths to reach the composer, examining a number of ways in which Western culture has absorbed the idea of Mozart, how various cultural agents have appropriated, deployed, and exploited Mozart toward both authoritarian and subversive ends, and how the figure of Mozart and his impact illuminate the cultural history of the last two centuries in Europe, England, and America. Modern reverence for the composer is conditioned by earlier responses to his music, and Everist argues that such earlier
responses are more complex than allowed by a simple "reception studies" model. Closely linking nine case studies in an innovative cultural and theoretical framework, the book approaches the developing reputation of the composer from death to the present day along three paths: "Phantoms of the Opera" deals with stage music, "Holy Spirits" addresses the trope of the sacred, and "Specters at the Feast" considers the impact of Mozart's music in literature and film. Mozart's Ghosts adeptly moves the study of Mozart reception away from hagiography and closer to cultural and historical criticism, and will be avidly read by Mozart scholars and students of eighteenth-century music history, as well as literary critics, historians of philosophy and aesthetics, and cultural historians in general.

The Golf Courses of the British Isles (1910), Bernard A. Darwin, 1997, 0940889269, 9780940889262. Gender in Popular Culture: Images of Men and Women in Literature, Visual Media, Material Culture, Peter C. Rollins, Susan W. Rollins, 1995, 0964175509, 9780964175501. This is a collection of essays about gender roles, images, & the perceptions of gender. Eleven college professors have brought together their expertise on how gender is expressed in literature (comic books, teen romances, detective novels, & belles lettres); visual media (films, theater, sports); & material culture (dress/image). These are the forms that shape our lives & our identities in a media age. This book is an
excellent vehicle for classes, but it was designed for the general reader as well. No jargon. It could be used for discussion groups in churches & libraries & ought to stimulate follow-up discussions & projects. The editors are a husband & wife team: Dr. Peter Rollins is an academic & Susan Rollins is a business woman in Tulsa who, along with her husband, regularly attends Popular Culture meetings where she encountered ideas needed in the marketplace. GENDER IN POPULAR CULTURE is her attempt to bridge the gap between professionals & readers. The book is laid out for easy reading & is illustrated with many examples of figures, issues & images analyzed. Order from Ridgemont Press, Rt. 3, Box 80, Cleveland, OK 74020; 918-243-7637.

Firefighting Strategies and Tactics, James Angle, Harlow, Michael Gala, William Lombardo, Craig Maciuba, 2000, 0766813452, 9780766813458. This book offers comprehensive coverage of all firefighting strategies and tactics, from standard company responsibilities and assignments to specialized situational strategies and tactics. Written by a team of experienced fire service personnel representing a variety of geographic and professional viewpoints, students get first-hand knowledge of strategies and tactics, whether it's fighting high-rise or wildland fires, from people who have been there. In a directed, logical format, this text takes students from basic concepts to the application of tactics and situational strategies for particular occupancies or types of fires. This text can be used in the college and university systems, as well as fire academies and fire departments for educating and training personnel in firefighting strategies and tactics, and it also serves as an excellent resource for fire department promotional exams.

Deviant behavior, Erich Goode, 1990, 0132040417, 9780132040419. The author seeks to understand deviance from the major sociological perspectives and theories of deviance by providing a comprehensive, balanced examination of the conceptual foundation of the sociology of deviance. An honest and direct approach is constant throughout the text and imparts a practical knowledge towards real world matters that enables the reader to think clearly about them. The book gives the reader interesting material about real life experiences of deviance from which they can learn and understand the different types of deviant individuals that exist in our society. Helps the reader understand the full range of deviance and emphasizes deviance is not always a motivated behavior whose occurrence needs to be explained. For anyone interested in understanding deviant behavior.

Is it fair for the sins of the father to be paid by the son? Jadeon Artimas lived in the 18th century among vast wealth and privilege, oblivious to the knowledge that he was born into a secret society of vampire hunters known as the Stone Masters. When Orpheus, the world's most notorious vampire, discovers the identity of the Stone Lord who murdered his beloved, he sets his undead ambition to making Lord Artimas pay the ultimate price by turning his son Jadeon into a creature of the night. In *A Vampire's Reckoning*, V.M.K. Fewings takes the readers through two centuries of rivalry in the seductive, dark side of England. Told from battling views of Jadeon and Orpheus, the book follows both nightwalkers as they wage a fierce war from SoHo to Stonehenge. But if Orpheus is punishing Jadeon, and Jadeon is punishing Orpheus, who will justice ultimately serve?

Introduction to Middle Eastern Law, Chibli Mallat, 2007, 0199230498, 9780199230495. This book provides an introduction to the laws of the Middle East, defining the contours of a field of study that deserves to be called 'Middle Eastern law'. It introduces Middle Eastern law as a reflection of legal styles, many of which are shared by Islamic law and the laws of Christian and Jewish Near Eastern communities. It offers a detailed survey of the foundations of Middle Eastern law, using court archives and an array of legal sources from the earliest records of Hammurabi to the massive compendia of law in the Islamic classical age through to the latest decisions of Middle Eastern high courts. It focuses on the way legislators and courts conceive of law and apply it in the Middle East. It builds on the author's extensive legal practice, with the aim of introducing the Middle Eastern law's main sources and concepts in a manner accessible to non-specialist legal scholars and practitioners alike. The book begins with an exploration of the depth and variety of Middle Eastern law, introducing the concepts of shari'a, fiqh, and qanun, (which all mean 'law'), and dwelling on Islamic law as the 'common law' of the Middle East. It provides a historical introduction to the contemporary Middle East, exploring political systems, constitutional law, judicial review, the laws of tort and obligations, commercial law (including Islamic banking, company law, capital markets, and commercial arbitration); and examines legislative reform in family law and the position of women in the legal system. The author considers the interaction between Islamic and Western laws and includes a bibliography designed for further research into the jurisdictions and themes explored throughout the book.

A Sense of Reality, Graham Greene, 1999, 0099282569, 9780099282563. A collection of four stories comprising 'Under The Garden' (A short novel); 'A Visit to the Morin'; Dream of a Strange Land' and 'A Discovery in the Woods'. In these four stories Graham Greene, one of the master of modern English fiction, has allowed himself the liberty of fantasy, myth, legend and dream. The results are, quite simply, superb.

20 Years Later, E. J. Newman, 2011, 0984498109, 9780984498109. LONDON, 2012: It arrives and with that the world is changed into an unending graveyard littered with the bones, wreckage, and memories of a dead past, gone forever. LONDON, 2032: Twenty years later, out of the ashes, a new world begins to rise, a place ruled by both loyalty and fear, and where the quest to be the first to regain lost knowledge is an ongoing battle for power. A place where laws are made and enforced by roving gangs-the Bloomsbury Boys, the Gardners, the Red Lady's Gang-who rule the streets and will do anything to protect their own. THE FOUR: Zane, Titus, Erin, Eve. Living in this new world, they discover that they have abilities never before seen. And little do they know that as they search post-apocalyptic London for Titus' kidnapped sister that they'll uncover the secret of It, and bring about a reckoning with the forces that almost destroyed...
all of humanity.

**Joy Is to Know Him, Josie G. Maxwell, M. E. Conway**, 1994, 0963875825, 9780963875822. Two brothers, Everett and Edwin Dawson, moved their families to Texas to raise horses in the 1820s, but found they first had to free a nation. Interesting weather, neighbors and personal problems added a little extra excitement to their lives. By the end of the story the quarter-horses they had set out to raise were flourishing along the Yegua Creek and Texas had become a country.

**Dan Alone, John Rowe Townsend**, 1985, 0140316264, 9780140316261. Palmed off to relatives by his mother, eleven-year-old Dan runs away, and after a series of adventures with a family of ne'er-do-wells finally brings together the people who will become the family he's always dreamed of having.

**Tom Brown's Schooldays, Thomas Hughes, Arthur Hughes**, 1869, 0192835351, 9780192835352. One of the classics of English children's literature, and one of the earliest books written specifically for boys, this novel's steady popularity has given it an influence well beyond the upper middle-class world that it describes. It tells a story central to an understanding of Victorian life, but its freshness helps to distinguish it from the narrow schoolboy adventures that it later inspired. The book includes an introduction and notes by Andrew Sanders.

**Click!, Peter Murray**, 2000, . Every photographer - amateur or professional - must have a copy of Click! in their book collection. Shaped like an actual lens, Click! captures the history of photography from its very beginning to current mobile
phone and digital formats. Filled with interesting past and present images, Click! is certain to please every fan of photography. Modern photography can be traced to the 1820s with the development of chemical photography. The first permanent photograph was an image produced in 1826 by the French inventor Nicephore Niepce. However, the picture took eight hours to expose, so he went about trying to find a new process. Working in conjunction with Louis Daguerre, they experimented with silver compounds based on a Johann Heinrich Schultz discovery in 1724 that a silver and chalk mixture darkens when exposed to light. Niepce died in 1833, but Daguerre continued the work, eventually culminating with the development of the daguerreotype in 1839. Many advances in photographic glass plates and printing were made through the nineteenth century. In 1884, George Eastman developed the technology of film to replace photographic plates, leading to the technology used by film cameras today. Digital imaging is rapidly replacing film photography in consumer and professional markets. Digital point-and-shoot cameras have become widespread consumer products, outselling film cameras, and including new features such as video and audio recording. Kodak announced in January 2004 that it would no longer produce reloadable 35 mm cameras after the end of that year. This was interpreted as a sign of the end of film photography. However, Kodak was at that time a minor player in the reloadable film cameras market. In January 2006, Nikon followed suit and announced that they will stop the production of all but two models of their film cameras: Click! will open focus your soul to photography in the 21st Century - A must for all fans of photography.

Jeeves and Wooster: The Code of the Woosters and Other Stories, Pelham Grenville Wodehouse, 1991, 0099142112, 9780099142119. A bumper collection containing two full length novels. "The code of the Woosters" is an affair which tests Wooster and Jeeves to the limit, involving Gussie Fink-Nottle, Madeleine Basset and a cow creamer. "Thank you Jeeves" finds Bertie in his country cottage playing his banjolele and Jeeves having given in his notice. To the house come his ex- fiancee Pauline, Sir Roderick Glossop and a child racketeer. Fortunately Jeeves is still around.

Kali: The Black Goddess of Dakshineswar, Elizabeth U. Harding, 1998, 8120814509, 9788120814509. Most major religions--Christianity, Judaism, Islam--do not acknowledge the feminine power of God. Nevertheless, this mysterious feminine power of God strikes a special chord in most people’s hearts. The concept of the Mother Goddess in the
West—the meek, ever-loving, patiently suffering female—is very different than the image of Kali in the Hindu pantheon. The Dakshineswar Temple in India is devoted to the worship of Ma Kali, and this book tells you all about the temple and how Kali is worshipped there—here festivals, her daily rituals. You get an insight into mystics who attained God by worshipping Kali, and read about the Godman Sri Ramakrishna, who lived and worshipped there—her festivals, her daily rituals. You get an insight into mystics who attained God by worshipping Kali, and read about the Godman Sri Ramakrishna, who lived and worshipped the live image of Kali at the Dakshineswar Kali Temple. This is a living story, and one of inspiration.

On Photography, Susan Sontag, 2008, 0141035781, 9780141035789. Susan Sontag's On Photography is a seminal and groundbreaking work on the subject. Susan Sontag's groundbreaking critique of photography asks forceful questions about the moral and aesthetic issues surrounding this art form. Photographs are everywhere, and the 'insatiability of the photographing eye' has profoundly altered our relationship with the world. Photographs have the power to shock, idealize or seduce, they create a sense of nostalgia and act as a memorial, and they can be used as evidence against us or to identify us. In these six incisive essays, Sontag examines the ways in which we use these omnipresent images to manufacture a sense of reality and authority in our lives. 'Sontag offers enough food for thought to satisfy the most intellectual of appetites'The Times'A brilliant analysis of the profound changes photographic images have made in our way of looking at the world, and at ourselves'Washington Post'The most original and illuminating study of the subject'New YorkerOne of America's best-known and most admired writers, Susan Sontag was also a leading commentator on contemporary culture until her death in December 2004. Her books include four novels and numerous works of non-fiction, among them Regarding the Pain of Others, On Photography, Illness as Metaphor, At the Same Time, Against Interpretation and Other Essays and Reborn: Early Diaries 1947-1963, all of which are published by Penguin. A further eight books, including the collections of essays Under the Sign of Saturn and Where the Stress Falls, and the novels The Volcano Lover and The Benefactor, are available from Penguin Modern Classics.

Magical Reels: A History of Cinema in Latin America, John King, 2000, 185984233X, 9781859842331. Still the most comprehensive analysis of the subject to have appeared in English, Magical Reels charts the development of Latin American film industries in a world increasingly dominated by the advanced technology and massive distribution budgets...
of the North American mainstream. John King sets up a historical framework to unfold the overlapping histories of cinema in the continent: the itinerant film-makers of the silent era who projected their films in cafes and village halls, the inventive use of vernacular music and local comedy in early sound pictures, the "golden age" of 1940s Mexican cinema, and the "new cinema" oppositional cinema made "with an idea in the head and a camera in the hand" of the late 1950s and beyond. A country-by-country account of this new wave allows detailed discussion of, for instance, Peronist cinema in Argentina, 1960s' revolutionary film-making in Cuba, state-sponsored cinema in 1970s' Brazil and Venezuela, and the struggle for democratization in Chile in the 1980s. A new chapter written for this edition examines Latin American cinema of the 1990s, raising issues such as globalization, new cinema audiences, film funding and distribution.

The Village of Stepanchikovo: And Its Inhabitants: from the Notes of an Unknown, Fyodor Dostoyevsky, 1995, 0140446583, 9780140446586. Summoned to the country estate of his wealthy uncle Colonel Yegor Rostanev, the young student Sergey Aleksandrovich finds himself thrown into a startling bedlam. For as he soon sees, his meek and kind-hearted uncle is wholly dominated by a pretentious and despotic pseudo-intellectual named Opiskin, a charlatan who has ingratiated himself with Yegor's mother and now holds the entire household under his thumb. Watching the absurd theatrics of this domestic tyrant over forty-eight explosive hours, Sergey grows increasingly furious - until at last, he feels compelled to act. A compelling comic exploration of petty tyranny, The Village of Stepanchikovo reveals a delight in life's wild absurdities that rivals even Gogol's. It also offers a fascinating insight into the genesis of the characters and situations of many of Dostoyevsky's great later novels, including The Idiot, Devils and The Brothers Karamazov.

The Mask, the Mirror, and the Illusion: Awakening to the Knowledge of Who You Truly Are, Julie Hutslar, 2008, 0975300008, 9780975300008. In a world inundated by irrational thinking and insane decisions, with charismatic characters and bizarre relationships, it is time to pull the curtain aside and reveal the Illusionary Oz. It is time to step up to bat and acknowledge your part in this insanity of tangible players set against an inexplicable dreamscape. Paramount in a world of suffering, war and pain is your choice to awaken to the knowing that this is only an illusion and you must step into freedom and truth for all of us. With our external and internal world on the brink of self-destruction and sabotage, you no longer have the luxury of letting someone else carry the burden. It is time to shift your society into being spirit focused and away from an ailing ancient society extolling the ego. And it can only be done by correcting the misperceptions of each individual that make up that world. The Mask, the Mirror and the Illusion is a succinct guidebook for walking you out of an ego-centered illusion into a spirit-led reality based on its original creator. In any journey it is important to have news from those who have gone before to light the way. The author, Julie Hutslar, converses with her companion J, who represents the Christ Within and guides us all out of our drowsy slumber into full awakening of who we truly are. With that awakening comes the realization that we have participated in this illusion more than we would like to admit, and also we carry within us the power to transform it for us all. Ms Hutslar, author of Relationships: Gifts of the Spirit, speaks clearly and openly, has a gift of communication and translation and constantly questions accepted reality
and authority. Her questions to J prove to be alleyways to self-awareness and she shares them with stories, analogies and examples. She also has a grasp on A Course in Miracles that helps her relay, through assistance from that text, the what nows as opposed to the whys. You are walked hand in hand through a maze of insane thinking we've all come to accept as normal and offered practical suggestions for seeing through this mind-created illusion to unveil the truth of who you really are. And it isn't about changing and becoming something else. It's about remembering who you have always been, but have simply been dreaming you are something you are not.

A Christmas Carol and Other Christmas Books, Charles Dickens, 2006, 0192806947, 9780192806949. A Christmas Carol has gripped the public imagination since it was first published in 1843, and it is now as much a part of the holiday season as is mistletoe or Santa's reindeer. Here is a wonderful collection of Dickens' Christmas stories, graced with many of the original drawings that appeared in the first edition. Pride of place goes to A Christmas Carol, of course, but the book also includes four other marvelous tales: The Chimes, The Cricket on the Hearth, The Battle of Life, and The Haunted Man. All five stories show Dickens at his unpredictable best, jumbling together comedy and melodrama, genial romance and urgent social satire. The volume also features an excellent introduction by Robert Douglas-Fairhurst, who offers invaluable background to the Christmas stories, illuminating the social questions they address, outlining their reception and the enduring popularity of "A Christmas Carol," and highlighting how their style and themes resonate in more complex ways in his major fictions. In addition, the book includes two appendices containing Dickens's article, "What Christmas Is As We Grow Older," and facsimile pages from Dickens's reading version of A Christmas Carol.

To Heaven and Back: True Stories of Those Who Have Made the Journey, Rita Bennett, 1997, 031021078X, 9780310210788. Some say they saw heaven. Others say they saw hell. All have had a near-death experience and all have a unique story.... Of the many best-selling books on near-death experiences, most offer a non-Christian perspective. To Heaven and Back tells of Christians whose near-death experiences led them to a deeper commitment to Christ and a greater longing for the life to come. Rita Bennett also probes the biblical record to help both Christians and non-Christians prepare for eternity. Affirming a biblical view of the afterlife, To Heaven and Back is challenging, inspirational, and hope-filled.

The Book of Pithies: A Pithy: A Brief and Forceful Expression, Joseph R. Simonetta, 1995, 0941594033,
Reflective thoughts on life. Expressions triggered by everyday experiences such as: -- "If there was an easy way out, it would be clogged with traffic". -- "Arrogance is the stupid form of confidence". -- "Listen to your early morning mind". Two volumes of thought-provoking and insightful observations about life, written by the author in his journals over a 20-year period. Each volume has four chapters, covering aspects of life such as: "The Human Condition", "Uncommon Sense", and "Getting Through Life". ...Potent and provocative... trenchant observations on an array of subjects, exposing some of our most cherished illusions, and putting words to often nebulous perceptions... Simonetta brings an extraordinary range of experiences to his writings". -- Write To Heal Magazine

The Oxford Handbook of Religion and Ecology, Roger S. Gottlieb, 2006, 0195178726, 9780195178722. The last two decades have seen the emergence of a new field of academic study that examines the interaction between religion and ecology. Theologians from every religious tradition have confronted world religions past attitudes towards nature and acknowledged their own faiths complicity in the environmental crisis. Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition, profound criticisms of the past, and ecologically oriented visions of God, the Sacred, the Earth, and human beings. The proposed handbook will serve as the definitive overview of these exciting new developments. Divided into three main sections, the books essays will reflect the three dominant dimensions of the field. Part one will explore traditional religious concepts of and attitudes towards nature and how these have been changed by the environmental crisis. Part II looks at larger conceptual issues that transcend individual traditions. Part III will examine religious participation in environmental politics.

Penny and Pocket, Gwenda Turner, 2002, 014351976X, 9780143519768. Pocket, a tiny kitten, is found abandoned on the side of the road. Penny, a Jack Russell terrier, immediately adopts her as her own. As well as carefully carrying her around the house and sleeping with her, Penny also produces milk so the kitten can feed. Penny is a devoted mother. A charming new picture book, based on a true story, with beautifully rendered illustrations.

Why Presidents Fail: White House Decision Making from Eisenhower to Bush II, Richard M. Pious, 2008, 0742563391, 9780742563391. Presidents are surrounded by political strategists and White House counsel who presumably know enough to avoid making the same mistakes as their predecessors. Why, then, do the same kinds of presidential failures occur over and over again? Why Presidents Fail answers this question by examining presidential fiascos, quagmires, and risky business—the kind of failure that led President Kennedy to groan after the Bay of Pigs invasion, "How could I have been so stupid?" In this book, Richard M. Pious looks at nine cases that have become defining events in presidencies from Dwight D. Eisenhower and the U-2 Flights to George W. Bush and Iraqi WMDs. He uses these cases to draw generalizations about presidential power, authority, rationality, and legitimacy. And he raises questions about the limits of presidential decision-making, many of which fly in the face of the conventional wisdom about the modern presidency.

JavaBeans Developer's Resource, Prashant Sridharan, 1997, 0138873089, 9780138873080. With JavaBeans Developer's Resource, you'll learn all you need to know to design, develop, and use Java components straight from a JavaBeans developer intimately familiar with both the Microsoft and Sun JavaBeans development environments. Review the basic concepts underlying all component software, and then take a close look at all fundamentals of the JavaBeans API, including bean properties, events, introspection, and persistence. Then, discover how JavaBeans goes far beyond previous component models. Learn about the customization and introspection routines that make JavaBeans components both powerful and seamless. Walk step-by-step through the construction and reuse of JavaBeans components, using extensive examples, code samples, and several complete Beans components on CD-ROM. Learn to use the GUI builder to assemble disparate Beans into applications of applets. Compare powerful visual development tools like Penumbra Software's Mojo and Symantec's Visual Cafe - and learn how they can help you build JavaBeans without ever seeing source code. JavaBeans Developer's Resource will help you understand and make the most of JavaBeans networking, including RMI and CORBA. You'll learn how to integrate JavaBeans with ActiveX components. Finally there's detailed coverage of how JavaBeans are already being used in the "real world" to enable powerful, secure applications that simply weren't possible before.

The Longwood Guide to Writing, Ronald F. Lunsford, Charles W. Bridges, Bill Bridges, 2001, 0321091124, 9780321091123. Reflecting Ron Lunsford and Bill Bridges' fifty years of combined teaching experience, The Longwood Guide to Writing is among the most accessible, up-to-date, and authoritative rhetorical guides to writing. A three-chapter sequence at the beginning of the text details strategies for the writing process, from generating ideas to shaping those ideas to rewriting. The invention chapter provides an extraordinary variety of prewriting strategies—some of them unique
to this book-while the revision chapter addresses both paragraph-level and global revision. A chapter on responding to readings strengthens reading skills both as a means of generating ideas for writing and as a way to become more critical readers of their own writing and that of their peers. Research and writing with resources, essay writing and writing portfolios are each covered in their own comprehensive chapters, in addition to the "Preparing for Publication" section which provides a brief handbook of grammar, usage, mechanics, punctuation, and spelling. The Second Edition features an expanded emphasis on the Internet, and twelve new professional essays. For those interested in sharpening their reading, writing and critical thinking

*Primate Ethology, Desmond Morris*, 1967, 0202368165, 9780202368160. This is a groundbreaking work in the field of ethology— the zoological study of animal behavior which was rapidly gaining ground in the 1960s when this collection was first published. These specially commissioned papers bought together studies of monkeys and apes from both the laboratory and the field. All of the contributors had been trained in the Lorenz/Tinbergen school and included Jane Goodall, R. Hinde and Y. Spencer-Booth, M. Moynihan, T.E. Rowell, Caroline Loizos, John Sparks, Wolfgang Wickler, and J. van Hooff. Many broad aspects of primate life, including facial expressions, sexual signals, grooming, play, social organization and parental care, are covered by the contributors and provided a whole new approach to primate behavior. As Morris points out in his introduction: "Most primate research behavior workers have, in fact, been drawn from the worlds of psychology and anthropology, and too little attention has been paid to detailed observation and motor pattern description." From 1956 he became seriously involved in the making of films and television programs about animal behavior and began studying the artistic abilities of apes. This was followed by the authorship of a number of natural history books and by the hosting of a popular TV program Zootime over several years. In 1959 he was appointed curator of mammals at the London Zoo. Between 1959 and 1967 he was responsible for the authorship of many natural history books, sometimes in co-authorship with his wife. Desmond Morris, author of The Naked Ape and The Human Zoo was born in Wiltshire, England in 1928. In 1951 he graduated from the University of Birmingham with first class honors and moved to Oxford to pursue doctoral studies in animal behavior under the tutorship of Dr. Niko Tinbergen. In 1973 Desmond Morris returned to Oxford as a research fellow at Wolfson College. In this role he worked with Tinbergen’s research group in the Department of Zoology and would continue to research human action-patterns. Over the ensuing years he has maintained his many interests in animal behavior research, the arts, and in making television programs and films. The more significant publications in these more recent years include Manwatching, a Field-Guide to Human Behaviour (1977), The Human Animal (1994) and Peoplewatching (2002). Darryl Bruce is professor in the Department of Psychology, Saint Mary’s University, Halifax.

The Poet and the Sea, Juan Ramon Jimnez , 2009, 1935210017, 9781935210016. "This is a very valuable book! Dozens of poems are here that have never been translated into English before, and I think Berg and Maloney have done beautifully transferring Juan Ramon's enthusiastic calm from Spanish to English. Terrific."--Robert Bly "As he observes metaphysical somersaults of sea and land, Juan Ramon is the master of replete simplicity. 'A steel sea' pops up on a 'hard flat field/of exhausted mines/in a devastation of ruin.' Or, like Emily Dickinson's 'hope falls down a hill,' Jimnez has, 'Hope, a seagull,/ alights here and there.' The utter nakedness of his verse touched virtually all modern Spanish poetry, directly engendering, for example, Rafael Alberti's masterful sea book, Sailor on Land, and 'I walk the streets of the sea.' In The Poet and the Sea, a delicious book perfectly rendered by Mary Berg and Dennis Maloney, Juan Ramon has made essential pacts of intimacy with the great waters of the world. The seas grow in trickery and gravity in endless dramas as two
figures emerge: a blind yet live sea and a poet who sees through the sea. The sea is a changing mirror of the poet who has imposed his vision on the whims of his companion sea."--Willis Barnstone This bilingual collection traces Juan Ramon Jimenez's relationship with the sea, a major theme in his work, from his seminal book Diary of a Poet Recently Married alongside other poems from his body of work. Seas I feel my boat has struck something large there, in the depths of the sea! And then nothing happens! Nothing...Silence... Waves... Nothing happens? Or has everything happened And are we now, calm, in someplace new? Juan Ramon Jimenez (1881-1958) was a member of the Generation of 1898, which ushered in a renaissance in Spanish poetry. In 1956 he received the Nobel Prize for Literature. Translators Marg Berg and Dennis Maloney have previously collaborated on Antonio Machado's book The Landscape of Castile.

Zeros and Heroes of Business, Thurman Richard White, 2006, 0977317951, 9780977317950. "Throughout the history of business practices in the United States, we have been inundated with many books concerning the way we ought to conduct business. Most of these books contain schools of thought that promise positive results if one follows better business practices. These books pretend to understand and explain business practices of corporate America; however, these books lack the science that explains and differentiates good and/or bad business practice outcomes. This book is structured differently. It is about my personal business experiences as an insider working with both the amazingly brilliant business people as well as the galactically inane. The case studies sited in this book relate to personal experiences and the application of science management. The reader will not be inundated with espoused theoretical commentary brought about by an armchair philosophy or academic conjecture. The case studies in this book contain interoffice memorandums and other related items pertaining to the business practices of several fortune 500 companies as well as State Medicaid bids in the area of healthcare computer technology. The reason for the inclusion of these business documents is for the reader to test the inferences for statistical significance and have the reader draw their own conclusions concerning management practices. This is not outside looking in; it is about inside speaking out."

Development as Freedom, Amartya Sen, 1999, 0198297580, 9780198297581. In Development as Freedom Amartya Sen quotes the eighteenth century poet William Cowper on freedom: Freedom has a thousand charms to show, That slaves howe'er contented, never know. Sen explains how in a world of unprecedented increase in overall opulence, millions of people living in rich and poor countries are still unfree. Even if they are not technically slaves, they are denied elementary freedom and remain imprisoned in one way or another by economic poverty, social deprivation, political tyranny or cultural authoritarianism. The main purpose of development is to spread freedom and its 'thousand charms' to the unfree citizens. Freedom, Sen persuasively argues, is at once the ultimate goal of social and economic arrangements and the most efficient means of realizing general welfare. Social institutions like markets, political parties, legislatures, the judiciary, and the media contribute to development by enhancing individual freedom and are in turns sustained by social values. Values, institutions, development, and freedom are all closely interrelated, and Sen links them together in an elegant analytical framework. By asking "What is the relation between our collective economic wealth and our individual ability to live as we would like?" and by incorporating individual freedom as a social commitment into his analysis, Sen allows economics once again, as it did in the time of Adam Smith, to address the social basis of individual well-being and freedom.

Championship Swim Training, Bill Sweetenham, John Atkinson, 2003, 0736045430, 9780736045438. Whether you're a coach looking to build or supplement your program or a swimmer seeking to improve your technique and time, you'll
benefit from swim coaching legend Bill Sweetenham's proven methods for improving performance in the backstroke, butterfly, breaststroke, freestyle, and individual medley. Sweetenham has spent his career developing world-class swimmers first for Australia, then for Hong Kong, and now for Great Britain. He engineered Australia's success at four Olympic Games and five Commonwealth Games and has coached 63 top swimmers in international competitions to 27 Olympic and World Championship medals. Now, through Championship Swim Training, he and coauthor John Atkinson, a former national team coach in Australia and current national youth coach with British Swimming, provide the detailed plans and strategies to help all swimmers maximize their swimming potential. Beginning with Sweetenham's five golden rules for swimming that apply to all swimmers regardless of their background, Championship Swim Training is divided into two parts. Part I, Technique Drills and Sets, deals with training zones and benchmark sets so critical to effective training and goal setting. Also included is a series of drill progressions and checklists that can be applied to each stroke and the individual medley. These progressions will help pinpoint stroke deficiencies and improve stroke technique as well as sculling, starts, turns, finishes, and kick and pull training. The checklists give swimmers and coaches tips for training and competition. Part II, Workouts and Programs, is full of information for coaches to plan the long-term development of juniors through masters swimmers. Sample training sets are provided and can be customized to suit the level of that swimmer or squad. Part II also covers the critical tapering phase to get swimmers ready for competition and provides detailed racing strategies. Dryland conditioning suggestions help swimmers train all year round, whether in or out of the water. And no world-class coaching book would be complete without a chapter on how to completely and objectively evaluate your training program. Championship Swim Training provides a complete roadmap for coaches and swimmers who want to follow a systematic and proven way to record-breaking times!

Interpretative Phenomenological Analysis: Theory, Method and Research, Jonathan A Smith, Paul Flowers, Michael Larkin, 2009, 1446243257, 9781446243251. 'It is not often I can use "accessible" and "phenomenology" in the same sentence, but reading the new book, Interpretative Phenomenological Analysis...certainly provides me the occasion to do so. I can say this because these authors provide an engaging and clear introduction to a relatively new analytical approach' - The Weekly Qualitative Report Interpretative phenomenological analysis (IPA) is an increasingly popular approach to
qualitative inquiry. This handy text covers its theoretical foundations and provides a detailed guide to conducting IPA research. Extended worked examples from the authors’ own studies in health, sexuality, psychological distress and identity illustrate the breadth and depth of IPA research. Each of the chapters also offers a guide to other good exemplars of IPA research in the designated area. The final section of the book considers how IPA connects with other contemporary qualitative approaches like discourse and narrative analysis and how it addresses issues to do with validity. The book is written in an accessible style and will be extremely useful to students and researchers in psychology and related disciplines in the health and social sciences.

The ONS Classification of Local and Health Authorities of Great Britain, Merryl Wallace, Chris Denham, 1996, 0116916540, 9780116916549. The Census Office of Great Britain and the General Register Office (Scotland) have produced several general purpose area classifications for local authorities and health districts and wards. Area classifications are a powerful and effective way of summarizing the complexity of census data. They provide simple indicators of the characteristics of the areas, and of the similarity between areas, for comparative or targeting purposes and as a variable for analysis with other data. The first volume is a source on the classification of local authority and health districts in Great Britain. Each district is classified first as the centre of a small cluster of districts which correspond closely to it - particularly useful for matching districts for comparative results. Each district is classified secondly as member of a cluster within a division of all districts. There are brief portraits of all the clusters illustrated with maps with listings for quick reference.

Philip Morsberger: A Passion for Painting, 2007, 1858943760, 9781858943763. Philip Morsberger (born 1933) is a
prolific painter who has worked and held influential teaching positions in America and Britain since the early 1960s. During his long career Morsberger has never been subservient to any one style of painting; his work has evolved through a number of distinct phases that have embraced realism, abstraction, and the American comic-strip tradition. Morsberger's most recent pictures, brimming with color and energy, blend abstract and narrative qualities. They are full of personal imagery, often based on the artist's childhood memories and humorous philosophy of life. This study by Christopher Lloyd explores the themes and styles that have shaped Morsberger's career to date. It features eighty of the artist's most significant works, introduced with an insightful examination of his techniques and inspirations. A sensitive biographical portrait is accompanied by photographs of Morsberger throughout his life. Also included are eight personal appreciations by such significant contemporaries as R. B. Kitaj, Brian Aldiss, Jon Hassler, and William Tucker.

The Cloud Catcher, Alethea McCollin, 2005, . A young man sets out to capture the clouds to free his town from a drought that would not end.

Non-coding RNAs and Epigenetic Regulation of Gene Expression: Drivers of Natural Selection, Kevin V. Morris, 2012, 1904455948, 9781904455943. Non-coding RNAs potentially play an active role in modulating gene transcription and epigenetic states. Several genes in differentiated cells may be under some form of RNA-based transcriptional and epigenetic regulatory control. This form of regulation may be controlled by selective pressures and influence the adaptability of the cell. The concept that RNA can control epigenetic states impacts our understanding of the basic fabric of the cell and may have therapeutic potential. Many studies have been carried out on the modulation of gene transcription by non-coding RNAs. This book, written by a group of distinguished scientists, represents an important overview and summary of the field to date. The 13 chapters are organized into three sections: a) Non-coding RNAs: Form, Function and Diversity; b) Non-coding RNAs: Gene Regulation and Epigenetics; and c) Non-coding RNAs: Disease and Therapeutics. This up-to-date volume is an essential book for those working in the area and represents a major information resource on current research in the fast-moving fields of epigenetics, the regulation of gene expression, and RNA research.

The New Literacies: Multiple Perspectives on Research and Practice, Elizabeth A. Baker, 2010, 1606236067, 9781606236062. With contributions from leading scholars, this compelling volume offers fresh insights into literacy teaching and learning and the changing nature of literacy itself in today's K12 classrooms. The focus is on varied technologies and literacies such as social networking sites, text messaging, and online communities. Cutting-edge approaches to integrating technology into traditional, print-centered reading and writing instruction are described. Also
discussed are ways to teach the new skills and strategies that students need to engage effectively with digital texts. The book is unique in examining new literacies through multiple theoretical lenses, including behavioral, semiotic, cognitive, sociocultural, critical, and feminist perspectives.

The Way I See It, David Wright, 2000, 0968656935, 9780968656938.

Engineering Field Theory with Applications, Leo Setian, 1992, 0521376971, 9780521376976. Professor Setian presents an integrated, interdisciplinary approach to several engineering fields such as electrical, magnetic, gravitational, fluid, thermal, diffusive, permeable, resistive, and acoustic. The author emphasizes fundamental principles of each field and the links among them. For instance, Gauss's law, Stoke's theorem, Laplace's and Poisson's equations are treated in each chapter. This innovative and exciting approach equips the reader with an interdisciplinary background, enabling a smooth transfer of knowledge between electrical engineering and electromagnetics, mechanical engineering and thermodynamics, and so forth. The text also includes a chapter containing the latest numerical methods for solving field problems.

Scottish Fairy and Folk Tales, Sir George Douglas, 2010, 1907256938, 9781907256936. This book, compiled by Sir George Douglas, contains not just fairytales but also tales of kelpies, brownies, stories of animals - foxes, crows, frogs and stories of mermen and comic tales as well. Contained herein are eighty-five stories like The Story of the White Pet, The Fisherman and the Mermen, The Seal-Catcher's Adventure, The Frog and the Crow, Habitrot, The Wee Bunnock and many, many more. In the days long before the advent of radio and television, the arrival of a story-teller in a village was an important event. As soon as it became known, there would be a rush to the house where he was lodged, and every available seat--on bench, table, bed, beam, or the floor would quickly be appropriated. And then, for hours together--just like some first-rate actor on a stage--the story-teller would hold his audience spell-bound. Campbell of Isla, who gathered and penned the Popular Tales of the West Highlands series in the 1870's, records that in his day the practice of story-telling still lingered in the remote Western Islands of Barra. Maybe, just maybe, there are a few alive today who remember this custom being continued at Poolewe in Ross-shire where the young people used to assemble at night to hear the old ones recite the tales which they had learned from their fore-fathers. This book is a treasure chest of classic Scottish Folklore, and will make fascinating reading for those interested in folklore in general. So take some time out and travel back to a period before television and radio, a time when tales were passed on orally--at the drying kilns, at the communal well and in homes. Livy on the Hannibalic War, D. S. Levene, 2010, 0198152957, 9780198152958. Livy's account of the Hannibalic War in his Third Decade (Books 21-30) is our fullest source for one of the most crucial wars of all time; it is also a narrative history of unparalleled richness, drama, and depth. D. S. Levene's book, the first large-scale general study of Livy's Third Decade, explores the things that make it distinctive not only within Livy's writing, but also within all ancient historiography. Levene examines such topics as Livy's construction of his narrative, his source-material and use of literary allusion, his battle scenes, his sophisticated but ambivalent attitudes towards non-Romans, and above all his challenging and revolutionary treatment of such things as chronology, causation, and indeed human character. Livy portrays a world in which military calculation and human reason constantly fail, a world in which events occur beyond normal human comprehension, but where everything is governed by a hidden moral structure. Livy's unique and original approach to history has often been misunderstood; Levene demonstrates the powerful and independent vision underlying the work, and compels readers to rethink many of our standard presuppositions about the nature of history-writing in the ancient world.

**Artoday, Edward Lucie-Smith**, 1999. This book is a world survey of the visual arts from the 1960s to the present, a period of extraordinary richness, and also of controversy and confusion. With a critical eye and a historian’s insight into wider trends, Edward Lucie-Smith provides an authoritative guide to this unstable world. Clear, accurate and informative, he charts the progress of contemporary developments and traces their sources and interrelationships. Since its first publication in 1995, *Art Today* has become recognized as an indispensable introduction to contemporary art. It is now reissued as a paperback, at a price that will make it affordable to students and all who seek orientation in this exciting but complex field.

**The Cedars of Lebanon, Martha Mahr**, 2010. The Cedars of Lebanon is a work of contemporary Christian fiction. The main character, Michael McFerron, is a young man who has begun his life and his career with promising potential while his personal relationships continually flounder. When his father passes away, Michael involuntarily begins a journey through a tangle of emotions and memories that suddenly come to the surface, many of which disrupt the image he and his family have carefully constructed and maintained over the years. Inadvertently, he also stumbles onto his father’s questionable business arrangements that pull those around him into confrontations with reality. Michael struggles first with acknowledging the past and then accepting it, while discovering that others are not so willing to accompany him on his journey to the truth. The story follows Michael's often digressive path towards God while he comes to terms with himself, his past and the emotions so long silenced within him. It portrays the subtle and tender way that God makes provisions for Michael even as he often retreats into the familiar patterns of his past, and how God ultimately lights the way into love and forgiveness. The book does not expound on any doctrine of belief but rather highlights the inner conflict of being in control of one's own life or admitting to the need of and yielding to the help of God.

Chicago to Springfield: Crime and Politics in the 1920s, Jim Ridings, 2010, 0738583731, 9780738583730. The story of Chicago gangsters in the 1920s is legendary. Less talked about is the tale of the politicians who allowed those gangsters to thrive. During the heyday of organized crime in the Prohibition era, Chicago mayor "Big Bill" Thompson and Gov. Len Small were the two most powerful political figures in Illinois. Thompson campaigned on making Chicago "a wide open town" for bootleggers. Small sold thousands of pardons and paroles to criminals, embezzled $1 million, and was then acquitted after mobsters bribed the jury. This book is the story of those Jazz Age politicians whose careers in government thrived on and endorsed corruption and racketeering, from Chicago to Springfield. It complements author Jim Ridings's groundbreaking biography, Len Small: Governors and Gangsters, which was praised by critics and situated Ridings as a trailblazer among Chicago crime authors.

Crossing the Ethnic Divide: The Multiethnic Church on a Mission, ISSN 0277-1071, Kathleen Garces-Foley, 2007, 0195311086, 9780195311086. While religious communities often stress the universal nature of their beliefs, it remains true that people choose to worship alongside those they identify with most easily. Multiethnic churches are rare in the United States, but as American attitudes toward diversity change, so too does the appeal of a church that offers diversity. Joining such a community, however, is uncomfortable—worshippers must literally cross the barriers of ethnic difference by entering the religious space of the ethnically "other." Through the story of one multiethnic congregation in Southern California, Kathleen Garces-Foley examines what it means to confront the challenges in forming a religious community across ethnic divisions and attracting a more varied membership.

Microprocessor and Microcontroller Fundamentals: The 8085 and 8051 Hardware and Software, William Kleitz, 1998, 0132628252, 9780132628259. Short, concise, and easily-accessible, this book uses the 8085A microprocessor and 8051 microcontroller to explain the fundamentals of microprocessor architecture, programming, and hardware. It features only practical, workable designs so that readers can develop a complete understanding of the application with no frustrating gaps in the explanations. An abundance of real-life hardware, software, and schematic interpretation problems prepare readers to troubleshoot and trace signals through situations they will likely encounter on the job.

Child Development and Education, Teresa M. McDevitt, Jeanne Ellis Ormrod, 2007, 0131188178, 9780131188174. For Child Development and Child/Adolescent Development courses taught in education departments. Child Development and Education, Third Edition is the only comprehensive child development text written specifically for educators. Written by a developmentalist and an educational psychologist, it provides the coverage and research found in the best child development texts but also helps readers understand how to use this information as educators. Another unique aspect of the text is how it illustrates concepts using children's and adolescents' school work, case studies, and a three
volume video CD that comes packaged with the book. These features of the text help readers actually see development, not simply read about it. Unique features include authentic student artifacts; observation guidelines with educational applications; development and practice features with concrete strategies for facilitating student development and learning; a chapter on development in reading, writing, math, and science; and extensive coverage of diversity and how as an educator to help all students thrive.

The 612 is an alternative history adult fiction, perfect bound with 428 pages.

An Introduction to the Mathematics of Financial Derivatives, Ali Hirsa, Salih N. Neftci, 2013, 012384682X, 9780123846822. An Introduction to the Mathematics of Financial Derivatives is a popular, intuitive text that eases the transition between basic summaries of financial engineering to more advanced treatments that use stochastic calculus. Requiring only a passing knowledge of calculus and probability, it takes readers on a tour of advanced financial engineering. This classic title has been revised by Ali Hirsa, who accentuates its well-known strengths while introducing new subjects, updating others, and bringing new continuity to the whole. Popular with readers because it emphasizes intuition and common sense, An Introduction to the Mathematics of Financial Derivatives remains the only "introductory" text that can appeal to people outside the mathematics and physics communities as it explains the hows and whys of practical finance problems. Facilitates readers' understanding of underlying mathematical and theoretical models by presenting a mixture of theory and applications with hands-on learning. Foregrounds an intuitive orientation, breaking up complex mathematics concepts in easy-to-understand notions. Encourages use of discrete chapters which can be used as complementary readings on different topics, offering flexibility in learning and teaching.
